

INPUT RECTIFIER DIODE

Description/Features

The 10ETS.. rectifier **SAFEIR** series has been optimized for very low forward voltage drop, with moderate leakage. The glass passivation technology used has reliable operation up to 150°C junction temperature.

The **High Reverse Voltage** range available allows design of input stage primary rectification with **Outstanding Voltage Surge** capability.

Typical applications are in input rectification and these products are designed to be used with International Rectifier Switches and Output Rectifiers which are available in identical package outlines.

$$V_F < 1.1V @ 10A$$

$$I_{FSM} = 200A$$

$$V_{RRM} 800 \text{ to } 1600V$$
