

Features

- Number of Keys:
 - One toggle mode (touch-on/touch-off), plus programmable auto-off delay and external cancel
 - Configurable as either a single key or a proximity sensor
- Technology:
 - Patented spread-spectrum charge-transfer (direct mode)
- Key outline sizes:
 - 6 mm x 6 mm or larger (panel thickness dependent); widely different sizes and shapes possible
- Electrode design:
 - Solid or ring electrode shapes
- PCB Layers required:
 - One
- Electrode materials:
 - Etched copper, silver, carbon, Indium Tin Oxide (ITO)
- Electrode substrates:
 - PCB, FPCB, plastic films, glass
- Panel materials:
 - Plastic, glass, composites, painted surfaces (low particle density metallic paints possible)
- Panel thickness:
 - Up to 12 mm glass, 6 mm plastic (electrode size and Cs dependent)
- Key sensitivity:
 - Settable via external capacitor (Cs)
- Interface:
 - Digital output, active high or active low (hardware configurable)
- Moisture tolerance:
 - Good
- Power:
 - 1.8V ~ 5.5V; 32.5 μ A at 1.8V
- Package:
 - 6-pin SOT23-6 (3 x 3 mm) RoHS compliant
- Signal processing:
 - Self-calibration, auto drift compensation, noise filtering
- Applications:
 - Power switch replacement in countertop appliances, irons, battery powered toys, heaters, lighting controls, automotive interior lighting, commercial and industrial equipment such as soldering stations and cooking equipment
- Patents:
 - QTouch® (patented charge-transfer method)

One-channel Toggle-mode Touch Sensor IC with Power Management Functions

AT42QT1012

Summary

Note: This is a summary document.
A complete document is available.

1. Pinout and Schematic

1.1 Pinout Configuration

1.2 Pin Descriptions

Table 1-1. Pin Listing

Pin	Name	Type	Comments
1	OUT	O	Output state. To switched circuit and output polarity selection resistor (Rop)
2	Vss	P	Supply ground
3	SNSK	I/O	Sense pin. To Cs capacitor and to sense electrode
4	SNS	I/O	Sense pin. To Cs capacitor and multiplier configuration resistor (Rm). Rm must be fitted and connected to either VSS or VDD.
5	Vdd	P	Power
6	TIME	I	Timeout configuration pin. Must be connected to either VSS, VDD, OUT or an RC network.

I Input only

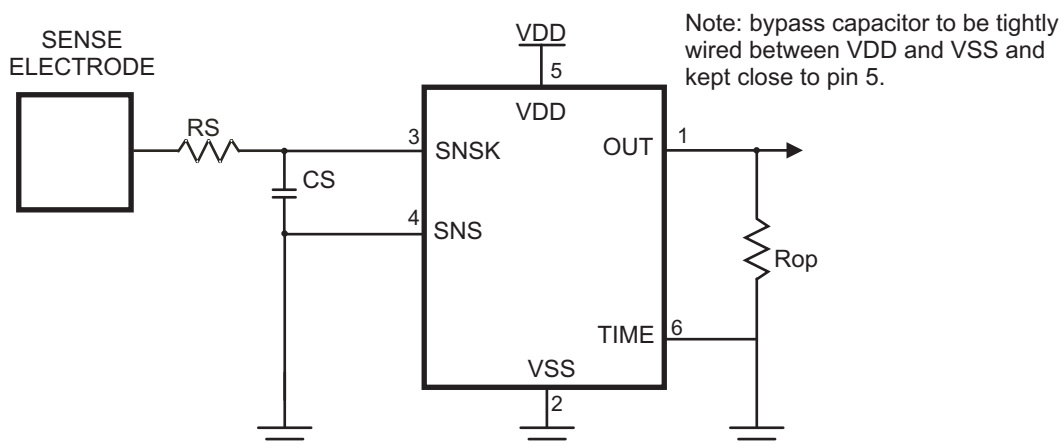

O Output only, push-pull

I/O Input and output

P Ground or power

1.3 Schematic

Figure 1-1. Basic Circuit Configuration
(active high output, toggle on/off, no auto switch off)

2. Overview of the AT42QT1012

2.1 Introduction

The AT42QT1012 (QT1012) is a single key device featuring a touch on/touch off (toggle) output with a programmable auto switch-off capability.

The QT1012 is a digital burst mode charge-transfer (QT™) sensor designed specifically for touch controls. It includes all hardware and signal processing functions necessary to provide stable sensing under a wide variety of changing conditions; only low cost, noncritical components are required for operation. With its tiny low-cost SOT-23 package, this device can suit almost any product needing a power switch or other toggle-mode controlled function, especially power control of small appliances and battery-operated products.

A unique “green” feature of the QT1012 is the timeout function, which can turn off power after a specified time delay ranging from minutes to an hour.

Like all QTouch® devices, the QT1012 features automatic self-calibration, drift compensation, and spread-spectrum burst modulation in order to provide for the most reliable touch sensing possible.

Revision History

Revision No.	History
Revision A – August 2009	<ul style="list-style-type: none">• Initial release for chip revision 2.4
Revision B – September 2009	<ul style="list-style-type: none">• Changes to Cs value.
Revision CS – February 2010	<ul style="list-style-type: none">• Updated for chip revision 3.1
